

Wild Ones SEPA Homeowner Rewilding Assistance 2024 Application

This grant is designed to provide landowners with information and advice to assist them in restoring native habitat on their property. A Wild Ones volunteer will visit the site with the owner and discuss the owner's vision for the project. The volunteer may provide the owner with assistance in selecting plants, technical information, and/or planting recommendations for the project. If the project qualifies, the chapter may provide the owner with up to 25 native plant plugs for the project.

Disclaimer

Advice from Wild Ones of SEPA is provided by our members, who are volunteers. Wild Ones of SEPA and its volunteers make no direct or implied guarantee about any of the advice or recommendations provided under this program. Our advice is focused on selecting the right native plants for the right place to provide the desired habitat values. The success of any habitat gardening approach is determined by many other factors as well, including in part the quality and origin of the materials, the installation process, and the maintenance routine.

Applications will be accepted and reviewed on a rolling basis during 2024. Email completed application to wildonesofsepa@gmail.com

If you are new to native plants or have any questions, please email us at wildonesofsepa@gmail.com for clarification or assistance with the application.

Property Owner Information

1. Name
2. Address
3. Contact Phone No.
4. Contact Email
5. Owner is a ___ public charity, ___ government entity, ___ business, ___ homeowners association, ___ private landowner, ___ other (please describe)

Project Details

6. Address of site location (if different from applicant location above).
7. Provide a general timeline for the project.
8. Give a description of your garden and include project objective(s). For example, erosion prevention, rain garden, butterfly or insect habitat, soil improvement, bird food habitat.
9. Attach a sketch or diagram (in .pdf or other digital format, of the entire area you intend to plant, as it currently exists, including 1) site dimensions, 2) existing vegetation, 3) existing natural and/or human-made structures, 4) scale, 5) planting conditions (light, soil, moisture), 6) directional points (North, East, South, West). Visit <https://wildones.org/sfe-sketch-samples/> to see sample sketches/diagrams of final site plans.
10. If the project site is not the owner's property, who will be responsible for managing and maintaining the planting area after the garden has been planted?
11. What site preparation is required in anticipation of planting, and how will you accomplish this?
12. What vegetation, if any, do you plan to remove prior to planting?

Project Budget

13. Provide an estimate of the budget available for this project.

Partner Organizations

14. If a nonprofit organization, community group, or other organization is assisting you with your project, provide the name, contact information, and type of support provided by each partner.
